

Who We Are

ISC-Audubon operates with the main purpose of benefiting society, while offering professional and sustainably based programs, certifications, products and services.

Our Mission

The ISC-Audubon mission is to foster sustainable living and lifestyles at home, work and play. We accomplish this through a number of award winning education and certification programs.

Our Vision

Our vision is to help create a more sustainable world.

We assist people and their businesses discover and implement sustainability solutions that are reliable, practical, efficient and that reduce risk.

Our Cause

Funds generated through memberships and donations are used to provide fruit & vegetable seeds, wildflower seed mix, and wildlife feed & birdseed to urban and suburban communities around the world.

These seeds are used by communities to establish fruit and vegetable gardens, bird and wildlife sanctuaries, and for the beautification of urban and suburban landscapes by creating flower and native plant gardens.
